

Objective of the Canadian Dividend Strategy

Enriched Investing™ purchases 25 Canadian companies with above average growth, at below average valuation and risk, high ROE, and strong dividend growth. The long-term objective of this strategy is to generate a total return that exceeds the Canadian equity market and to manage the volatility of the portfolios through the purchase and sale of stocks. This strategy is focused purely on publicly traded Canadian stocks that pay dividends. Preservation of capital is a key tenet in this investment philosophy and the strategy will hold cash when there are not appropriate stocks to be purchased. This active management approach was developed by Robert J. McWhirter, CFA, and is consistent with the investment philosophy known as Enriched Value Alternative Investing™.
