ABOUT US

INCORPORATED ESTABLISHED 1989 Enriched Investing™ is an investment management firm founded in 1989. Over the last 30 years we have developed unique portfolio strategies ideally suited for high net worth investors and institutions. Our current platforms offer customized portfolio strategies and “Fund” type investment disciplines which set perimeters and objectives in a more regimented structure.

TD Centre | Toronto | enrichedinvesting.com | Info@enrichedinvesting.com

OBJECTIVES

Enriched Investing's experienced management team focuses on reaching above average capital growth and preservation of capital using a unique disciplined approach. Our proprietary strategy[‡] involves the evaluation of the top 350 Canadian dividend paying stocks. After our analysis we purchase up to 15 companies typically with above average growth, at below average valuation and risk, high ROE, low debt to equity, and better ability to pay down debt. The portfolio is monitored daily and adjusted monthly.

The long-term objective of this strategy is to generate a total return that exceeds the Canadian equity market and to manage the volatility of the portfolios through stock selection and the ability to hold significant levels of cash. This strategy is focused purely on publicly traded Canadian stocks that pay dividends.

[‡]Robert McWhirter has licenced this strategy to Enriched Investing™

STRATEGY

We buy up to 15 Canadian companies with

- above average growth at
- below average valuation and risk with
- high ROE
- low Debt to Equity and
- better ability to pay down Debt

We look for: ABOVE average GROWTH

At June 9th/2020 the 15 Canadian stocks in the strategy had these compelling fundamentals (on a weighted basis):

The average year over year GROWTH per share of:

Sales, Earnings, EBITDA and Free Cash flow

15%, 56%, 26% and 218% BETTER

at BELOW average VALUATION (LOWER is BETTER)

The average four quarter trailing EV/Sales and Enterprise Value to EBITDA

40% and 59% BETTER.

with LOW HISTORICAL RISK

The average 5 year: BETA

40% BETTER.

with ABOVE average RETURN ON TOTAL ASSETS (4 qtr trailing)

40% BETTER. (7.7% vs 5.5%)

with ABOVE average Annual Dividend Growth

47% BETTER (+9.4% vs 6.4%)

To July 31, 2020

GROWTH OF \$1,000,000
From February 2018

GROWTH OF \$1,000,000
From July 2019

PERFORMANCE

To July 31, 2020

BACKTEST

The Canadian Conservative Growth Strategy Backtesting

Assumptions: The backtesting of the Canadian Dividend Strategy assumes that purchases and sales on the first day of each month are transacted at the closing price of the prior monthend. Purchases and sale prices include a commission of 5 cents per share.

Methodology: Up to 15 Canadian equity stocks are selected based on the Canadian Dividend Strategy. This strategy is created using Morningstar/CPMS software and is comprised of both Morningstar/CPMS variables and proprietary user-defined variables. These variables are assigned proprietary weights. The strategy is rebalanced to buy and sell stocks on the first day of each month based on data as of the market closing at the prior monthend.

Risks and Limitations: These results are not based on actual transactions but are based on backtested results that are backward looking. There is no management fee included in the results, so the annual percentage management fee that would be charged on an actual portfolio should be subtracted from the returns. In addition, the transaction and market impact costs may differ from the assumed commission. Therefore, actual portfolio results may have differed substantially from the posted backtested performance. There is no guarantee that past performance will be repeated in the future. There is no guarantee that actual portfolio results over this time period would have been the same as the backtested results.
