ASSET CLASS Canadian Equity

AUM \$3,000,000

MANAGEMENT FEE Annual Advisory Fee 1.5%\*

\*Management fees are set based on total investment amount

# ABOUT US

INCORPORATED ESTABLISHED 1989 Enriched Investing™ is an investment management firm founded in 1989. Over the last 33 years we have developed unique portfolio strategies ideally suited for high net worth investors and institutions. Our current platforms offer customized portfolio strategies and “Fund” type investment disciplines which set perimeters and objectives in a more regimented structure.

# OBJECTIVES

Enriched Investing's experienced management team focuses on reaching above average capital growth and preservation of capital using a unique disciplined approach. Our proprietary strategy<sup>‡</sup> involves the evaluation of the top 350 Canadian dividend paying stocks. After our analysis we purchase up to 15 companies typically with above average growth, at below average valuation and risk, high ROE, low debt to equity, and better ability to pay down debt. The portfolio is monitored daily and adjusted monthly.

The long-term objective of this strategy is to generate a total return that exceeds the Canadian equity market and to manage the volatility of the portfolios through stock selection and the ability to hold significant levels of cash. This strategy is focused purely on publicly traded Canadian stocks that pay dividends.

<sup>‡</sup>Robert McWhirter has licenced this strategy to Enriched Investing™

Why Enriched?

Specialty Boutique Asset Manager

## FOUR PILLARS

1. Private Ownership, Independent Structure
2. Singular Focus on Investment Management
3. Management's Deep Experience
4. Culture of Clarity and Integrity

## Decision-Making Combining all 3 Analytical Disciplines

Fundamental Analysis

OVER 100 YEARS EXPERIENCE

Margaret M. Samuel, MBA, LL.B., CFA, Portfolio Manager

Darryl Cailes, B.A., PFP, Chairman

David Chapman, CIM, BA, Chief Strategist

Robert McWhirter, CFA, Strategic Advisor

We buy up to 15 Canadian companies with

- above average growth at
- below average valuation and risk with
- high ROE
- low Debt to Equity and
- better ability to pay down Debt

We look for: **ABOVE average GROWTH**

At October 19, 2021 the 15 Canadian stocks in the strategy had these compelling fundamentals (on an equally weighted basis):

The average year over year **GROWTH** per share of:

Sales, Earnings, EBITDA and Free Cash flow

**56%, 137%, 106% and 191% BETTER.**

at **BELOW average VALUATION** (LOWER is BETTER)

The average four quarter trailing P/E and Enterprise Value to EBITDA

**37% and 73% BETTER.**

with **LOW HISTORICAL RISK**

The average 5 year: BETA and Earnings Stability

**23% and 26% WORSE.**

with **ABOVE average RETURN ON EQUITY** (4 qtr trailing)

**32% BETTER. (17.61 vs 13.30)**

with **ABOVE average Annual Dividend Growth**

**6.5 times BETTER. (+12.49 vs 1.67)**

To December 30, 2021

**GROWTH OF \$1,000,000**  
From February 2018

**GROWTH OF \$1,000,000**  
From July 2019

# BACKTEST

## The Canadian Conservative Growth Strategy Backtesting

**Assumptions:** The backtesting of the Canadian Dividend Strategy assumes that purchases and sales on the first day of each month are transacted at the closing price of the prior monthend. Purchases and sale prices include a commission of 5 cents per share.

**Methodology:** Up to 15 Canadian equity stocks are selected based on the Canadian Dividend Strategy. This strategy is created using Morningstar/CPMS software and is comprised of both Morningstar/CPMS variables and proprietary user-defined variables. These variables are assigned proprietary weights. The strategy is rebalanced to buy and sell stocks on the first day of each month based on data as of the market closing at the prior monthend.

**Risks and Limitations:** These results are not based on actual transactions but are based on backtested results that are backward looking. There is no management fee included in the results, so the annual percentage management fee that would be charged on an actual portfolio should be subtracted from the returns. In addition, the transaction and market impact costs may differ from the assumed commission. Therefore, actual portfolio results may have differed substantially from the posted backtested performance. There is no guarantee that past performance will be repeated in the future. There is no guarantee that actual portfolio results over this time period would have been the same as the backtested results.
