MANAGEMENT TYPE Active Daily management

MIN. INVESTMENT \$500,000

RETURN OBJECTIVE Capital Growth & Preservation of Capital

ASSET CLASS Canadian Equity

MANAGEMENT FEE Annual Advisory Fee 1.5%\*

\*Management fees are set based on total investment amount

# ABOUT US

INCORPORATED ESTABLISHED 1989 Enriched Investing™ is an investment management firm founded in 1989. Over the last 35 years we have developed unique portfolio strategies ideally suited for high net worth investors and institutions. Our current platforms offer customized portfolio strategies and “Fund” type investment disciplines which set perimeters and objectives in a more regimented structure.

# OBJECTIVES

Enriched Investing's experienced management team focuses on reaching above average capital growth and preservation of capital using a unique disciplined approach. Our proprietary strategy involves the evaluation of the top Canadian dividend paying stocks. After our analysis we purchase up to 15 companies targeting above average growth, below average (low is better) valuation and risk, high ROE, low debt to equity, and better ability to pay down debt. The portfolio is monitored daily and adjusted monthly.

The long-term objective of this strategy is to generate a total return that exceeds the Canadian equity market and to manage the volatility of the portfolios through stock selection and the ability to hold significant levels of cash. This strategy is focused purely on publicly traded Canadian stocks that pay dividends.

Why Enriched?

Specialty Boutique Asset Manager

## FOUR PILLARS

1. Private Ownership, Independent Structure
2. Singular Focus on Investment Management
3. Management's Deep Experience
4. Culture of Clarity and Integrity

# STRATEGY

We buy up to 15 Canadian companies with

- above average growth at
- below average valuation and risk with
- high ROE
- low Debt to Equity and
- better ability to pay down Debt

We look for: ABOVE average GROWTH

At October 16, 2023 the 15 Canadian stocks in the strategy had these compelling fundamentals\* (on a weighted basis):

1. ABOVE AVERAGE GROWTH: The average year over year GROWTH per share of: Sales, Earnings, EBITDA and Free Cash flow

51%, 2.4x, 2.4x and 26% BETTER (17.2 vs 11.4, 172% vs -17%, 72 vs -6, -25 vs -34).

2. at ATTRACTIVE VALUATION (LOWER is BETTER)

The average four quarter trailing P/E and Enterprise Value to EBITDA

16% and 68% BETTER (12.0 vs 14.3x and 7.1 vs 22.7x).

3. with LOW VOLATILITY

The average 5 year: BETA

27% WORSE (1.27 vs 1.0).

with ABOVE average RETURN ON INVESTED CAPITAL (4 qtr trailing)

2.5 times BETTER. (10.5% VS 4.2%)

4. with ABOVE average Annual Dividend Growth

4.3 times BETTER. (50% vs 11.5%)

\*compared to the weighted S&P/TSX Composite, source: CPMS Morningstar

# BACKTEST

## The Enriched Capital Conservative Growth Strategy Backtesting

**Assumptions:** The backtesting of the Enriched Capital Conservative Growth Strategy assumes that purchases and sales on the first day of each month are transacted at the closing price of the prior month end. Purchases and sale prices include a commission of 5 cents per share.

**Methodology:** Up to 15 Canadian equity stocks are selected based on the Enriched Capital Conservative Growth Strategy. This strategy is created using Ino investor software and is comprised of both Ino investor variables and proprietary user-defined variables. These variables are assigned proprietary weights. The strategy is rebalanced to buy and sell stocks on the first day of each month based on data as of the market closing at the prior month end.

**Risks and Limitations:** These results are not based on actual transactions but are based on backtested results that are backward looking. There is no management fee included in the results, so the annual percentage management fee that would be charged on an actual portfolio should be subtracted from the returns. In addition, the transaction and market impact costs may differ from the assumed commission. Therefore, actual portfolio results may have differed substantially from the posted backtested performance. There is no guarantee that past performance will be repeated in the future. There is no guarantee that actual portfolio results over this time period would have been the same as the backtested results.
